S

- Ensure technical safety and reliability of the warehouse for safe and secure storage of goods.
- Ensure a continuous improvement of HSE management system
- Any personnel has a right to intervene in case of detection of unsafe work and hazardous conditions

E

- Comply with all applicable laws, regulations and other requirements in accordance with accepted obligations
- To constantly work on improvement in terms of environmental protection of the country
- Ensure a continuous improvement of HSE management system
- Pollution Prevention
- Any personnel has a right to intervene in case of detection of environmental pollution

Scope of work

- BR industrial Operations offers trained surface wellhead technicians along with specialized maintenance and well services equipment for wells. Our Wellhead Maintenance service is backed by our range of purpose-built products and high quality, proven lubricants, sealants and flushing products. We offer specific testing and maintained programs as instructed by our clients or can put together a full well integrity program to ensure your entire field is effectively tested and serviced.

- Surface Wellhead Inspection and Reporting
- Annulus Pressure Testing
- Annulus Diagnostics
- XMAS Tree Valve Testing
- Insitu Pressure Testing
- XMAS Tree and Wellhead Valve
- Lubrication and Functioning
- Void Testing and Monitoring
- SCSSV Bleed Back Volumes
- Burst Disc Replacement
- Tree Cap O
- Actuator Services
- Valve Replacement and Servicing
- Ball Valve Service and Installation
- Coatings Repair
- Subsidence Monitoring
- BR industrial Operations conducts servicing in line with OEM procedures and practices.

Our equipment

- Pickup truck with canopy
- Piston compressor
- Diesel generator
- Grease pump
- Hand pump
- Analogue chart recorder
- Hydrostatic pressure testing pump with chart recorder

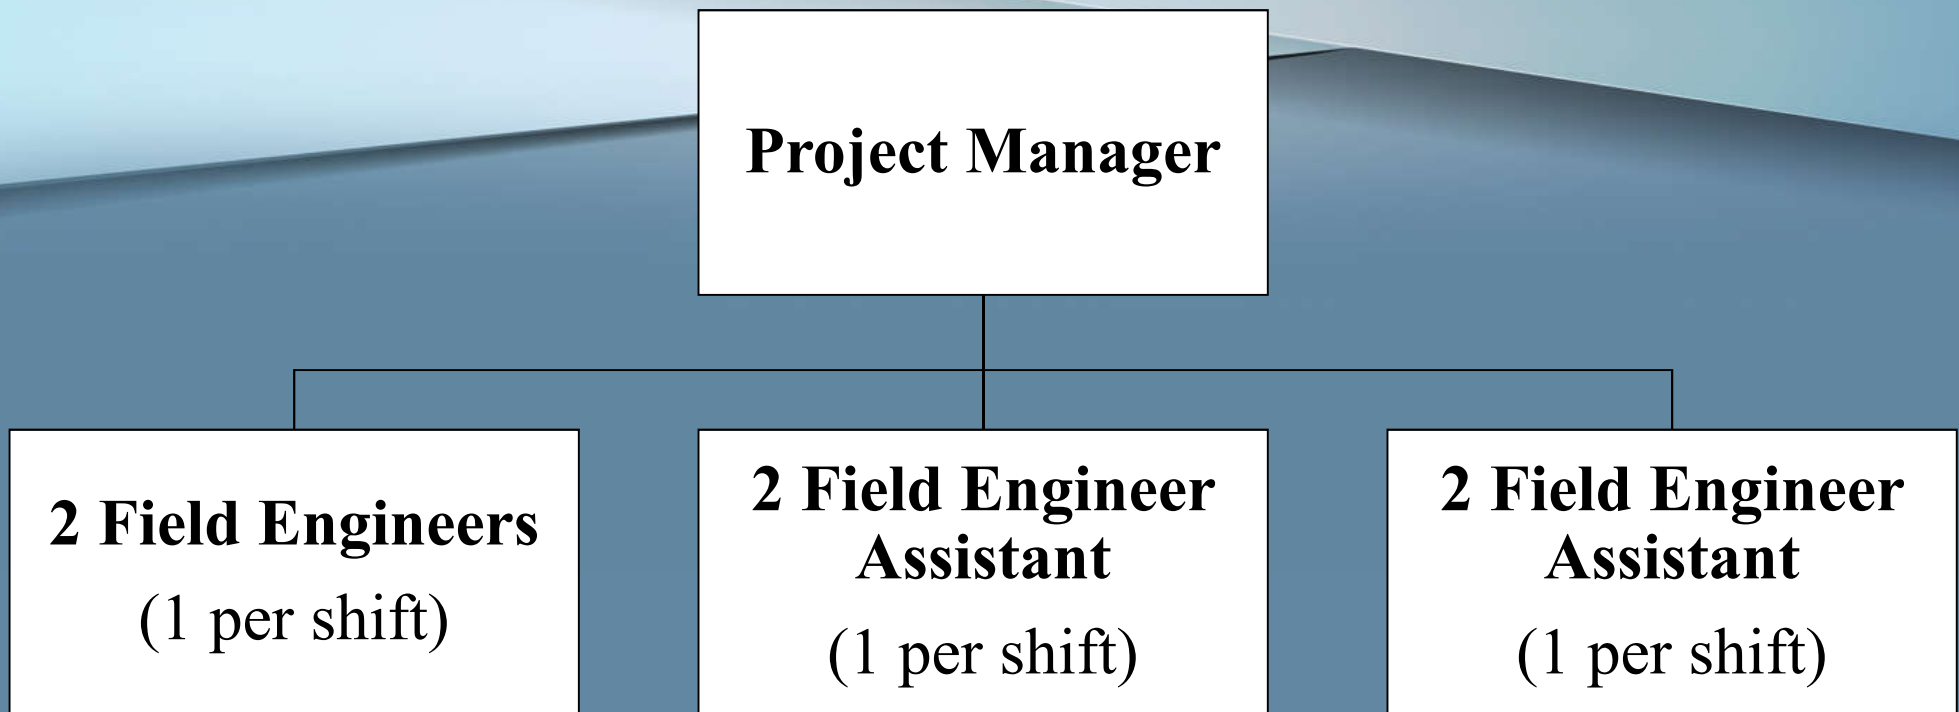

Our accessories

- Flanges as per API 6A with wide range of sizes and for 5000, 10000 and 15000 psi.
- Four zone gas analyzer (Dräger)
- Safety equipment for confined space entry.
- Vise
- Spark-free bronze hand tools (Bahco Tools)
- Fittings as per API 6A
- Lubricants (EZY-TURN)
- Hydraulic oil (Total)
- Anti-corrosion chemicals

Personnel for WHM services

- Field Engineers have more than 6 years experience in wellhead maintenance with the manufacturers such as AK Korvet JSC, FMC and Cameron.
- Field Engineers Assistant have less than 3 years experience in wellhead maintenance with the manufacturers such as AK Korvet JSC, FMC and Cameron.

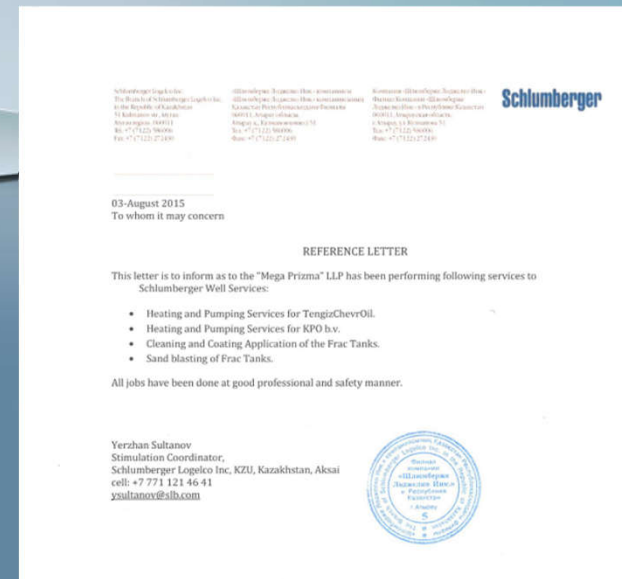

Our team consist of highly experienced professionals

- 15 years experience in high pressure/high temperature pumping
- 15 years work experience in Acid pumping and Matrix acidizing
- 6 years in Wellhead maintenance in Mangystau Region, RoK
- Down hole completion
- Pressure rating and surface equipment
- First Aid and CPR
- H2S safety Training
- Safe handling of the fluids
- Heavy equipment operation and Driving
- Wax build up and clogging identification and further cleaning

Recommendation Letter

BR Industrial Operations LLP (formerly MegaPrizma LLP) has been exceptional business partner for the Hadid Engineering SDN BHD for the multiple projects in Mangystau Region.

BR Industrial Operations LLP provided services such as well stimulation works by pumping acid to perforation zones as well as hot oil works. Additionally, the reservoir flushing services were provided too.

The development and maintenance of the Emir Oil Oilfields has been remarkable challenge for all the stakeholders, Contractors, Subcontractors, Suppliers and individuals involved. The great administrative, human, material and technical requirements have proven the professionalism and competency of those who participated in this complex project.

Based on the above, this is to recommend BR Industrial Operations LLP to undertake future dewaxing, pumping and reservoir flushing works as a reliable partner, either within projects in Mangystau Region or with any other company with similar requirements.

Name: NAJME BAKAR

Position: GENERAL DIRECTOR
